

Alniche Lifesciences Celebrates its Crystal Anniversary

July 2022: Alniche Lifesciences, one of the leading and fastest growing pharma companies of India has successfully completed 15 years of its journey today by offering specialized high-quality, effective, affordable medicines and wellness products from all around the world. With its cutting-edge products, Alniche is the preferred partner of Global healthcare organizations to launch their Global brands in India.

Today, Alniche has 800+ employees with 5000+ distribution points both for prescription and OTX brands, covering 90,000+ doctors and 40,000 hospitals. The company is ranked among the top in Nephrology and Critical care, pioneering in bringing novel molecules/formulations in Renal Care & Critical care. Also, the company is focused on therapies such as Skincenticals, Gastroenterology, Neuropsychiatry, Cardiac Diabetes Care etc.

Talking about the completion of 15 years, Girish Arora – MD, Alniche Lifesciences, said, *"It all started 15 years ago when after more than two decades of experience of heading niche therapy areas in India in various renowned companies, I felt the void for a Nephrology focussed organization covering all Nephrologists across India. Till then most organizations had Nephrology as a division with a divided focus on this therapy segment. I was convinced that the specialists and patients in this segment needed greater attention and this conviction was the driving force behind the inception of Alniche".*

He further added, *"From the very outset, we had a goal of being a leading global pharma company. This journey would not have been possible without our customers who trusted us, industry analysts who recognized our products, and partners who invested in us. Also, I would like to thank my team who supported me at every step of the way and went above and beyond to serve our customers."*
